Applicant's election of Claims 1-7 in Paper No. 4 is acknowledged. Because applicant did not distinctly and specifically point out any errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 8-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Election was made **without** traverse in Paper No. 4.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, & 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Slates 5,406,712.

Slates shows a sight pin block having sight pin openings 15 for a series of sight pins. To adjust the sight of Slates, one would fire test shots for different yardages to determine the correct positioning of each of the five pins 31. These pins would then be locked in position using screws 41. The pin positioning would then be correct for a bow

having a speed of the test bow (say, 280 feet per second). If the sight pin block were to be transferred to another bow with a speed of 280 feet per second, it would only be necessary to determine the corresponding arrow flight range for one of the pins; each of the other pins will then be in correct position.

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
